PRESS RELEASE: CELCAA reaction to publication of the EU–US Joint Statement on the Framework Trade Agreement

CELCAA, representing agri-food trade, acknowledges yesterday's publication of the EU–US agreement setting a tariff of 15% for most EU lines entering the US from 1 September.

While the agreement is not a cause for celebration, and explicitly excludes some agri-food lines from any potential 'zero for zero' deal going forward, it provides a baseline for further discussions going forward. CELCAA continues to hope for a more constructive trading environment between the EU and US in the months and years to come.
